

PTA Strategy

Community enrichment through fun and fundraising

Strategy Introduction

The mission of the PTA for Stamford Green is fun and fundraising. Teachers and parents/carers work very closely together to benefit the school and children. The funds will be spent to enrich the school community and the experience of children, throughout their school journey. We aim to engage with the local community to help achieve this by providing fun fundraising activities and events.

Objectives

The objectives set to deliver the strategy can be defined through short, medium and long term fundraising projects and goals. Contributors to the PTA, through participating in activities and events, will be able to see these projects completed and goals fulfilled.

Regular PTA meetings are held and everyone is welcome to attend. At these meetings, in collaboration with the school, short, medium and long term spending is agreed along with a time frame.

Short Term Objectives

These can be best described as those contributions which are enrichments in a singular event rather than a legacy. For example, an ice-lolly at the end of Sports Day for every child. This rewards them for all the effort during races and for having a caring attitude by supporting their friends.

Medium Term Objectives

These are the goals which would provide for and be regularly used by the children and school community. Medium term objectives require a greater funding commitment from the PTA and as such there will be less of them than short term objectives. One example of a medium term objective is the spending related to two subscriptions for the school library. As a result, the library has copies of a newspaper and magazine written especially for children.

Long Term Objectives

These goals will be singular in nature as they require a longer term commitment to deliver. Long term objectives will bring a legacy to the school for the future, alongside supporting current children in fulfilling their individual potential during their time at Stamford Green. Currently the long term goal for the school is to create an all-weather path around the top field with opportunities for play.

Updates and Progress

The PTA Bulletin and Spending Update will keep parents informed about which short term objectives have been completed and also about progress towards the medium and long term objectives.
