

Stamford Green Primary School and Nursery

Spanish Compendium

“To learn a language is to have one more window from which to look at the world.”

Chinese proverb

What is the vision for Spanish at Stamford Green?

- To learn relevant language to enable children to communicate with their peers and other Spanish speakers.
- To speak with confidence and fluency and speak with understanding.
- The Modern Foreign Languages (MFL) curriculum will be progressive to give the children the foundations for their future language learning.
- Through our MFL lessons, the children will gain a love of learning a new language, to inspire and enable them when they continue in the next stage of their curriculum.
- To have an awareness and knowledge of cultures, traditions and celebrations from Spanish speaking countries.

Our curriculum is brought to life through our seven commitments:

HAPPINESS

We want the children to enjoy their Spanish lessons and develop a keen interest in learning a new language. Learning a new language can be daunting; we want to foster enjoyment and an ethos where the children are not scared to have a go when speaking aloud in another language. Spanish lessons will engage the children through the use of songs, games and role play conversations.

INSPIRING

We will inspire the children through their learning and understanding of a new language. Children enjoy to share their new knowledge of the Spanish language with friends and families and this inspires them to want to learn more and apply in real life situations. Throughout the MFL curriculum, we will integrate the teaching of traditions and cultures in Spain and other Spanish speaking countries and this will help to inspire the children that they have a well-rounded knowledge of Spanish culture.

LEARNING

Whilst learning languages is part of the National Curriculum in Key Stage 2, we have chosen to begin to teach the children Spanish from Year 1. Young children have an incredible ability to absorb and reproduce new sounds, meaning that they are able to learn pronunciation like a native speaker. Learning when young allows opportunities to associate a new language with fun activities without the self-consciousness or embarrassment that can often act as a block for older children. In every Spanish lesson, time will be spent to review and revise previous learning before moving on with new content. We know that in order to become a fluent speaker of another language, the children need regular and repeated practice. As a result, the children in Year 1 – Year 6 will have a ringfenced timetabled lesson for learning Spanish.

TOGETHERNESS

Our well planned Spanish curriculum ensures that the children appreciate the world around them and understand the feeling of being united with others. When learning a new language, children are all at similar starting points and so they understand the feeling of learning something new,

together with their peers. Our Spanish curriculum ensures that children gain an understanding of Spanish life and culture, through the teaching of stories and important events and traditions.

VALUES

When learning a new language, it is vital that we demonstrate many of our school's twenty two values. This will include: effort, perseverance, resilience and self-belief. Through learning about different cultures and celebrations, the children will demonstrate respect for each other. Learning the Spanish language and also about their cultures and beliefs contribute greatly to the children's personal development and encourages open-mindedness and a sense of global citizenship.

AMBITION

By learning one language from Year 1 until the end of Year 6, it is our ambition that the children leave Stamford Green with the ability to listen with understanding and speak to an accomplished standard with confidence and some fluency. In order to achieve this aim, the children are taught by a languages specialist teacher, following a structured, progressive curriculum that builds on the children's knowledge and understanding.

ACHIEVEMENT

It is our aim that when the children leave Stamford Green in Year 6, they are well prepared for the next stage of their learning at secondary school. We want the building blocks of our curriculum to be firm foundations for our children's future learning, whichever modern foreign language they go on to study. We ensure that children are given plenty of opportunity to retrieve and practise language already taught in order to ensure their foundations are really stable. We make links with existing knowledge to enable enhanced development and progression.

What are the aims of the national curriculum for languages?

The national curriculum for languages aims to ensure that all pupils:

- Understand and respond to spoken and written language from a variety of authentic sources.
- Speak with increasing confidence, fluency and spontaneity, finding ways of communicating what they want to say, including through discussion and asking questions, and continually improving the accuracy of the pronunciation and intonation.
- Can write at varying length, for different purposes and audiences, using the variety of grammatical structures that they have learnt.
- Discover and develop an appreciation of a range of writing in the language studied.

By the end of Year 6 at Stamford Green, our children will...

Behaviours	See themselves as linguists with solid foundations of knowledge and love of the spoken language to generate excitement at the opportunity to build on and develop their language learning at Key Stage 3.
Attitudes	Have been challenged to experience how another language works, identifying links and contrasts with English and their own English language learning. To understand it takes time, effort and practice to become 'fluent' and to have the self belief and aspiration to want to achieve this.
Skills	Communicate orally with increasing confidence, fluency and spontaneity using accurate pronunciation and intonation. Understand, manipulate and respond to spoken and written language.
Knowledge	Know the vocabulary and grammatical structures appropriate to practical communication within a range of familiar and routine matters. Apply phonological knowledge and imitation to develop accurate pronunciation.

Experiences	Be exposed to a range of language learning materials selected to focus and practise on target language. Games, songs, stories, videos, role-play, conversations, grammatical exercises and use of dictionaries to contribute to their learning experience.
Technology	Learning is enhanced through the use of videos and songs selected specifically for the targeted language content. Recordings of aspects of learning may be played back to children to highlight and develop specific areas. Children learn the benefits and limitations of online dictionaries when developing their knowledge of the Spanish language.
Sustained	Children have an enjoyment and passion for learning a foreign language which they can build on in the future. By understanding that language is how people communicate, children have a deeper insight into other cultures and a better understanding of the world.

British Values and Spiritual, Moral, Social and Cultural Learning in Spanish

British Values: Children will explore their own individual liberty by considering themselves as global citizens. Mutual respect is taught and given when the children are expressing their opinions and beliefs. Children are taught and encouraged to show each other respect. Pupils are taught about historical and cultural differences between the UK and Spain. Other cultures are always discussed in a respectful manner, emphasising that although things may be different, each culture is equally valuable and to be respected.

Spiritual: Spiritual development is supported when learning Spanish by creating a deeper understanding of cultures, beliefs and traditions of other countries. Children learn about different festivals that take place in Spain. Children have the opportunities to reflect on these traditions and make links to their own.

Moral: Children develop a curiosity of how other people in other countries and societies live. It enables pupils to appreciate our own laws and country and reflect upon personal behaviour and the behaviour of others.

Cultural: Children are given opportunities to apply and develop their knowledge of language and language learning to explore their own identities and those of others. Children compare and contrast celebrations such as Christmas and Easter and study festivals and traditions. This helps them to understand the and appreciate the diversity of other countries. Through comparing and contrasting daily routines, food and educations systems at home and in Spain, children gain a better understanding of their own roots, cultures and traditions.

Social: Learning Spanish leads to gains across the curriculum, particularly with oracy and English skills. It supports and celebrates the international dimension and gives the children enjoyment and a sense of achievement in their learning. Children are given opportunity to express themselves creatively and imaginatively in Spanish. Through role-play, paired work, singing, poems, storytelling and games, children reinforce and embed the language and become confident readers.
