6 July 2026

Dear Parents/Carers,

Club Room Weekly Information

High Ashurst

It was a pleasure being part of High Ashurst last week and Miss Burgess could not have been prouder of the effort, resilience and enthusiasm of the children.

An enormous well done!

Meet the Teacher

On Wednesday, the children will have time to meet their new teachers both in the Club Room and for those who bridge, their mainstream class as well. Their new teachers will be starting to build relationships this side of term to ease the transition into next year.

Another Warm Week!

Due to rising temperatures, our timings for breaks and lunches may be different. Please reassure your children that this is only for a short period to ensure that everyone is safe and happy.

Hot weather and changes for Monday 6.7.26 to Friday 10.7.26

Timetable Variations

- Any outdoor PE will be taking place at 9.00am with an adapted lesson so the children are not taking part in vigorous physical activity.
- There will be no Golden Runs and instead the children will have a story in the shade.
- Break and lunch play will be combined and start at 10.00am when it is cooler. All class timetables will change to accommodate this. Lunch will still be eaten at the same time. Teachers will be adjusting lessons to allow for the fact that things will take longer and rest periods will be added.

On days when the school day is different, we know the children see it as an adventure and often recount the day with joy!

General Notes

- Please ensure that your child has a sun hat with them and sunscreen has been applied before coming to school.
- If you are freezing water in your child's water bottle, please make sure that some water will be available in it for them to drink straight away so they are not waiting for some to melt. Teachers will be ensuring that the children refill their bottles throughout the day and have access to them.
- There are no changes to uniform and shoe requirements as shorts and summer dresses etc. can be worn but please leave school jumpers at home.
- are taking action to ensure the classrooms are as cool as possible, and we will all be utilising the shade on the field, as well as the library, which has air conditioning.

NEW

Children in Y1 - Y6 may bring in a small personal handheld, foldable desk fan for this week only as long as:

- They are named.
- They can be folded and kept on desks, so they are not needed to be held when on.
- The fan blades have a case around them so they are not exposed.

The school is not responsible for loss/damage or charging/changing batteries.

Please talk to your child about how to use their fan responsibly to follow our school rules of ready, respectful and safe. If someone is using it inappropriately, they will be given a warning and then the fan may be removed for a period of time.

Please also note the DfE's stance: 'Mechanical fans can be used to increase air movement if temperatures are below 35°C – at temperatures above 35°C fans may not prevent heat-related illness and could worsen dehydration.' This may inform your decision about whether you want your child to have one.

weekly

Zones of Regulation

This week, we will continue to focus on the Yellow Zone, helping children recognise feelings such as worry, excitement and nervousness that can arise when meeting new people and preparing for change. We will be spending time getting to know new teachers and talking about the transition to the next academic year, exploring what may be similar and what may be different. Children will be encouraged to share their thoughts and feelings, ask questions and develop confidence about the changes ahead.

Values

Our Club Room value this week is 'good manners'. We will be encouraging children to use polite language, show kindness and respect, and demonstrate positive manners when interacting with both adults and peers. This will help support the development of positive relationships within the Club Room and across the wider school community as children prepare for their new classes.

Learning

Our learning focus this week includes:

Key Stage 1 will continue with bespoke maths and English activities tailored to individual needs. Alongside this, children will be learning about life cycles and exploring changes in our bodies, helping them develop an understanding of growth and change.

Key Stage 2 will continue working on individual maths, English and science activities. In PSHE, pupils will be learning about puberty and the changes that occur as they grow older, with discussions delivered in a sensitive and age appropriate way. We will also continue to support children with transition activities and opportunities to share information about themselves with their new teachers.

If you have any questions or concerns, please do not hesitate to get in touch. Have a great week.

Miss Burgess and Mrs Thomas
